When an option replaces equipment already included in a package, the confirmed price difference is quoted separately.

Important information

Retail pricing: For consumer advertising, the VAT-inclusive price is the final displayed retail price. VAT is calculated at the Croatian rate of 25%; destination-country taxation may differ.

Not included: Outboard engine, trailer, transport, registration, commissioning outside the factory, seat cushions and equipment not explicitly listed are excluded.

Engine configuration: Maximum engine power is 73.5 kW / 100 hp. The selected engine, steering, fuel and electrical configuration must comply with the applicable technical documentation and declaration of conformity.

Hull Kit: The Hull Kit is partly completed watercraft intended for professional completion. It is not ready to be put into service and must be completed with the required conformity documentation.

Equipment substitutions: The Luxury package includes a stainless-steel bimini instead of the aluminium bimini. When an option replaces package equipment, the confirmed price difference is quoted separately.

Teak and custom work: Teak is charged according to actual covered area. Complex patterns, special finishing, equipment substitutions and non-standard work require an individual quotation.

Compatibility: Bimini, roll bar, bow rail, engine and other equipment combinations are subject to technical compatibility and the confirmed final layout.

Commercial terms: Prices are ex works Sukošan, Croatia. Delivery time, payment schedule and final specification are confirmed in the written order confirmation. Images are illustrative; the confirmed specification governs.

Distributor enquiries: This document shows recommended retail prices. Dealer terms, territory, order quantities, warranty responsibilities and delivery arrangements are agreed separately.

REQUEST A QUOTE

Send the required configuration, intended use, preferred engine power and delivery country for a written offer and confirmed lead time.
