Important information

Retail pricing: For consumer advertising, the VAT-inclusive price is the final displayed retail price. VAT is calculated at the Croatian rate of 25%; destination-country taxation may differ.

Powertrain choice: Betina 700 can be configured for an outboard engine or an inboard diesel engine. The engine, configuration-specific preparation, controls, installation components and commissioning are not included unless expressly confirmed in the written specification.

Not included: Engine, trailer, transport, registration, commissioning outside the factory, cushions, teak deck covering, hard top and equipment not explicitly listed in the selected package are excluded.

Hull Kit: The Hull Kit is partly completed watercraft intended for professional completion. It is not ready to be put into service and must be completed with the required conformity documentation.

Teak and custom work: Teak is charged according to the actual covered area. Complex patterns, templates, special finishing, equipment substitutions and non-standard work require an individual quotation.

Technical compatibility: Engine, hard top, bimini, solar, bow thruster, anchor system, tanks and other equipment combinations are subject to technical compatibility, weight distribution and the confirmed final layout.

Commercial terms: Prices are ex works Sukošan, Croatia. Delivery time, payment schedule and final specification are confirmed in the written order confirmation. Images are illustrative; the confirmed specification governs.

Distributor enquiries: This document shows recommended retail prices. Dealer terms, territory, order quantities, warranty responsibilities and delivery arrangements are agreed separately.

REQUEST A QUOTE

Send the required package, intended use, preferred powertrain and delivery country for a written offer and confirmed lead time.
