REQUEST A QUOTATION • Send your preferred specification, intended use, engine power and destination country for a written quotation and confirmed delivery time.

Important information

Retail prices: All prices shown include VAT at the Croatian rate of 25%; taxation in the destination country may differ.

Not included: The outboard engine, trailer, transport, registration, commissioning outside the factory, cushions and equipment not expressly listed are not included.

Engine configuration: Maximum engine power is 73.5 kW / 100 hp. The selected engine, steering, fuel system and electrical configuration must comply with the applicable technical documentation and declaration of conformity.

Hull Kit: The Hull Kit is a partly completed boat intended for professional completion. It is not ready to be put into service and must be completed with the required conformity documentation.

Equipment substitutions: When an optional item replaces equipment already included in the package, the confirmed price difference is charged separately.

Teak and custom work: Teak is charged according to the actual area covered. Complex patterns, special finishes, equipment substitutions and non-standard work require an individual quotation.

Compatibility: Combinations of bimini tops, roll bars, railings, engines and other equipment depend on technical compatibility and the confirmed final layout.

Commercial terms: Prices are ex works Sukošan. Delivery time, payment schedule and final specification are confirmed in the written order confirmation. Photographs are for illustration; the confirmed specification applies.

Distributor enquiries: This document shows recommended retail prices. Distributor terms, territory, quantities, warranty responsibilities and delivery terms are agreed separately.
